

Insure the Climate

– Can Space Contribute?

Conference on October 26, 2023

*Space and climate mastery hand in hand
to ensure that climate targets are met*

FUGLESANG
CENTER

Rotary 
D2320 & D2350

With the support from
Swedish National Space Agency
and Spira Teoretiska Gymnasium

Come and join us in building the future!

Join us for a very special one day event where we gather to focus fully on solutions to the challenges we as humans face as a result of climate change.

This is not your ordinary conference. In fact, if there is **one event not to miss this autumn, it is this one.** You get to interact with and listen to world leading experts, thought leaders, gatekeepers, policy makers and visionaries at top level within the fields of climate, sustainability, tech and space. Be ready to expand your mind and open up for new thought provoking, innovative ideas and perspectives. You will leave with strategies, tools, new connections and a supportive network to help you navigate the coming years with more clarity and a renewed sense of hope.

After all – where attention goes energy flows, so let's come together and co-create the future we wish to see. **Together!**

This is where we meet,
Space Arena auditorium.
The Arena is a large auditorium
located in the central district
of Stockholm, easily accessible
by many public transports.

First open Conference on Climate Insurance Thinking

The event gathers on stage eye-opening participations by the following speakers:

Zeynep Kahraman-Clause

Head of Academia and Research at The SHIFT project, French think-tank on social transformation and 20k member NGO.

Professor John Hassler

Climate Economy at Stockholm University and member of the Nobel Prize Committee (Economy).

Professor Christer Fuglesang

Physics and Space Travel at the Royal Institute of Technology (Stockholm) and former astronaut.

ADDITIONAL SPEAKERS INCLUDE:

Gordon McInally, Rotary International President (digitally)

Mats Persson, Minister for Education, Sweden

Anna Rathsman, Director-General, Swedish National Space Agency

Fredrik Winberg, High tech materials entrepreneur

Cecilia Hertz, Space entrepreneur

Mathias Sundin, Founder WARP Institute

Marcello Romano, Professor, Space Systems Engineering, PoliTO, Turin, Italy

Ingmar Rentzhog, CEO and founder, We Don't Have Time

*You insure your house, your children, why not humanity... open up to **insuring the climate.***

*The insurance solution must be **equitable, sustainable and retractable.***

*The SHIFT project scientists and volunteers cooperate to advocate the holistic shift to **a post-carbon economy.***

Peder Jonsson, Fuglesang Space Center

Kristofer Erlandsson, Past district governor D 2350, Rotary International

16.30 **End of event**

Subject to changes.

Drought, flood and a satellite image of a hurricane.

Why do we need an Insure the climate day?

Climate change is high on the agenda. Humanity is struggling to solve problems of our own making. There is every reason to take an open view of our ability to innovate and change, as well as to utilise our experience in risk management.

Visit: <https://insure-the-climate.confetti.events/>

*Bring your friends.
Invite your colleagues and come.
Support the event and exhibit.
Be a sponsor – there are different levels to choose from.
In short, participate and be inspired as well as inspire!*
